I consider myself as a highly capable IT engineer with an array of credentials to support this statement. Complementing my diverse skill set, I have Seven years' experience of fintech, banking IT knowledge & worked with different banks in Sri Lanka, Nepal, Bangladesh, Philippines, Sweden, South Africa & I stayed more than three years in the Philippines and Cambodia as an implementation engineer. I have stayed three years in the UK for my studies and completed Applied computing BSc(Hons) at Northumbria University in Newcastle. I firmly believe that my knowledge and experience gained from work will add value to this position and ultimately your organization.

I would appreciate the opportunity to join an esteemed and reputable company such as yours. Please have a look at my enclosed resume for detailed information about my work experience and education. Looking forward to discuss more in person.

Highlights of my qualifications include:

- Handling configuration and deployments of Enterprise applications in jboss, Websphere, Weblogic application servers in clustered environments
- Installation, configuration, monitoring, backup/restore, purging and maintenance PostgreSQL, Oracle.
- Creating and maintain new environments for Java, C, .Net software platforms and handover to Developers, QA & UAT teams.
- Test C, Java and server performance by using simulators and analyzes the data from server and DB logs. Send findings with server, DB logs to developers and identifying variations and potential high-risk areas with system infrastructure team.
- Support clients to maintain troubleshoot and patch deployments using remote logins. Visiting clients premises to check critical issues, provide consultations and conduct trainings.
- Documenting systems architecture implementation details and key points on configurations, operations and maintenance with detailed descriptions. Providing walk-through on provided documents and hands-on training to improve clients confidence on system

Sincerely,

Eranga Basnayake
